We Contribute to the Sustainable Development of the Region...

Solutions and highlighted projects:

SMART CITY SOLUTIONS

Development of solutions to reduce crime and the perception of insecurity among the population.

PUBLIC TRANSPORT SOLUTIONS

Efficient and sustainable management of the public transportation fleet in the capitals of Chile, Panama and Mexico.

“Infovía Digital”:

The connectivity improvement initiative in Mato Grosso do Sul includes 6,950 km of fiber optic network and an investment of US\$174 million, which benefits 2,8 million people. It also involves the construction of a Network Operations Center and the provision of free internet services and video surveillance in public squares.

“Bosque Iluminado”:

Pioneer project that will provide 4G coverage and high-speed internet to over 2,000 rural communities and schools in southern Chile. It will benefit more than 30,000 households and 150,000 individuals, improving safety and connectivity in forest operations and reducing the digital divide in six regions.

We are a company focused on our customers, focused on responding proactively and closely to their business challenges. We lead the digital transformation in the region, thanks to our ability to project innovation, trust, solidity, agility, leadership and experience.

Credit Rating Agencies:

"SONDA showed a significant 19% increase in its revenues in 2022, driven by growth in all its geographies (...). It is expected that the EBITDA

margin will increase to around 11% by 2025, as the strategic plan for 2022-2024 is implemented." **Fitch Ratings**

"SONDA has a significant size and a high degree of diversification (...) The commercial efforts made, and which would be further enhanced with the strategic plan

for 2022-2024, have sustained growth in closing deals, aiming for large scale contracts." **ICR Chile**

Sustainability in our DNA

ESG Practices within SONDA

SONDA Wellness Program: an initiative that promotes the physical, mental and social health of our employees.

SONDA Women: program that seeks to increase the representation of women in SONDA and in the IT industry, in addition to attracting, retaining and promoting leadership skills in the leaders of the future.

Internal recycling Program: and internal actions to encourage the responsible use of resources.

Diversity & Inclusion: we develop internal initiatives with the aim of generating organizational awareness and an increasingly inclusive culture.

Data Center Kudos: we have the Leed Silver certification from the US Green Building Council, guaranteeing efficient energy use and a 100% renewable energy supply.
