

## USE CASE

### Banking and Insurance

## Housing and End-to-End Data Center Management Solution for Global Financial Institutions

Implemented in: Chile

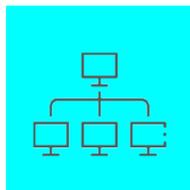

### Challenge:

Ensure continuous, secure, and well-governed operation of critical infrastructure, with end-to-end management and rapid incident response in a global financial environment.

### Solution:

Provision of comprehensive housing and data center management services, including power supply, cooling, physical and logical security, cabling, infrastructure maintenance, continuous monitoring, incident resolution, and change management.

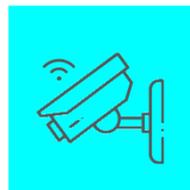

## Benefits:

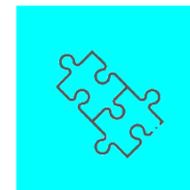

End-to-end management of data center infrastructure.

High availability and **operational resilience**.

**Continuous monitoring** and rapid incident response.

**Governance and structured** change control.
