Digital Maturity Assessment and BIM-Based Transformation Roadmap Solution

Implemented in Chile

Challenge:

Understand the organization's digital maturity level and define a strategic roadmap, using the BIM methodology as the central pillar to guide the evolution of processes, management, and operational quality.

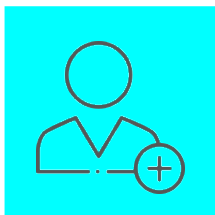

Solution:

- Assessed the organization's digital maturity level.
- Defined a strategic digital transformation roadmap.
- Adopted the BIM methodology as the foundation for future development.
- Implemented short-term actions to improve quality management.

Benefits:

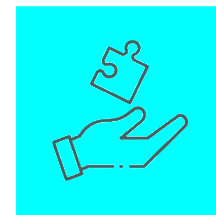

Short-term actions implemented to **accelerate response to quality deviations.**

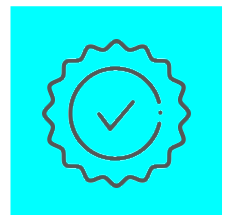

Improved efficiency of construction **control and monitoring processes.**

Strengthening of the quality **management system structure.**

Greater predictability and **consistency in project execution.**

A solid foundation for the **continuous evolution of quality standards.**
