

CASE STUDY

Banking & Insurance

Cloud-Based Core Banking Solution under a SaaS Model for a 100% Digital Bank

Implemented in: Chile

Challenge

Enable the operation of Chile's first fully digital bank, ensuring regulatory compliance, high availability, and scalability without reliance on physical infrastructure.

Solution

- Migration of mission-critical banking applications to a fully cloud-based architecture.
- Support for essential processes such as teller operations and foreign exchange transactions.
- Digital banking enabled by scalability, security, and regulatory compliance.

Beneficios:

■ Lower costs (30–40%) through a cloud-based SaaS model.

■ Scalability and high resilience supported by international security standards.

■ Faster time-to-market to launch and operate as a digital bank.
