

SUCCESS CASE

## Smart Cities & Mobility

### Account-Based Open Ticketing Solution for Multimodal Transport

Implemented in: Guatemala

#### Challenge:

Address the growing demand for urban mobility with a modern and interoperable payment system that integrates different transport modes and reduces the use of private vehicles.

#### Solution:

- Implementation of Account-Based Ticketing (ABT) collection, with centralized accounts.
- Broad acceptance of bank cards, financial applications, and contactless payments.
- Certified multimodal platform, ensuring security and interoperability.

## Benefits:

■ Ease of use for citizens in public transport.

■ Safer and more agile digital payments.

■ Modernization of urban transport infrastructure.

■ Greater efficiency in card recharge and distribution.

■ Integration with multimodal urban mobility.
