Intelligent Video Surveillance Solution for Traffic Management at Highway Toll Booths

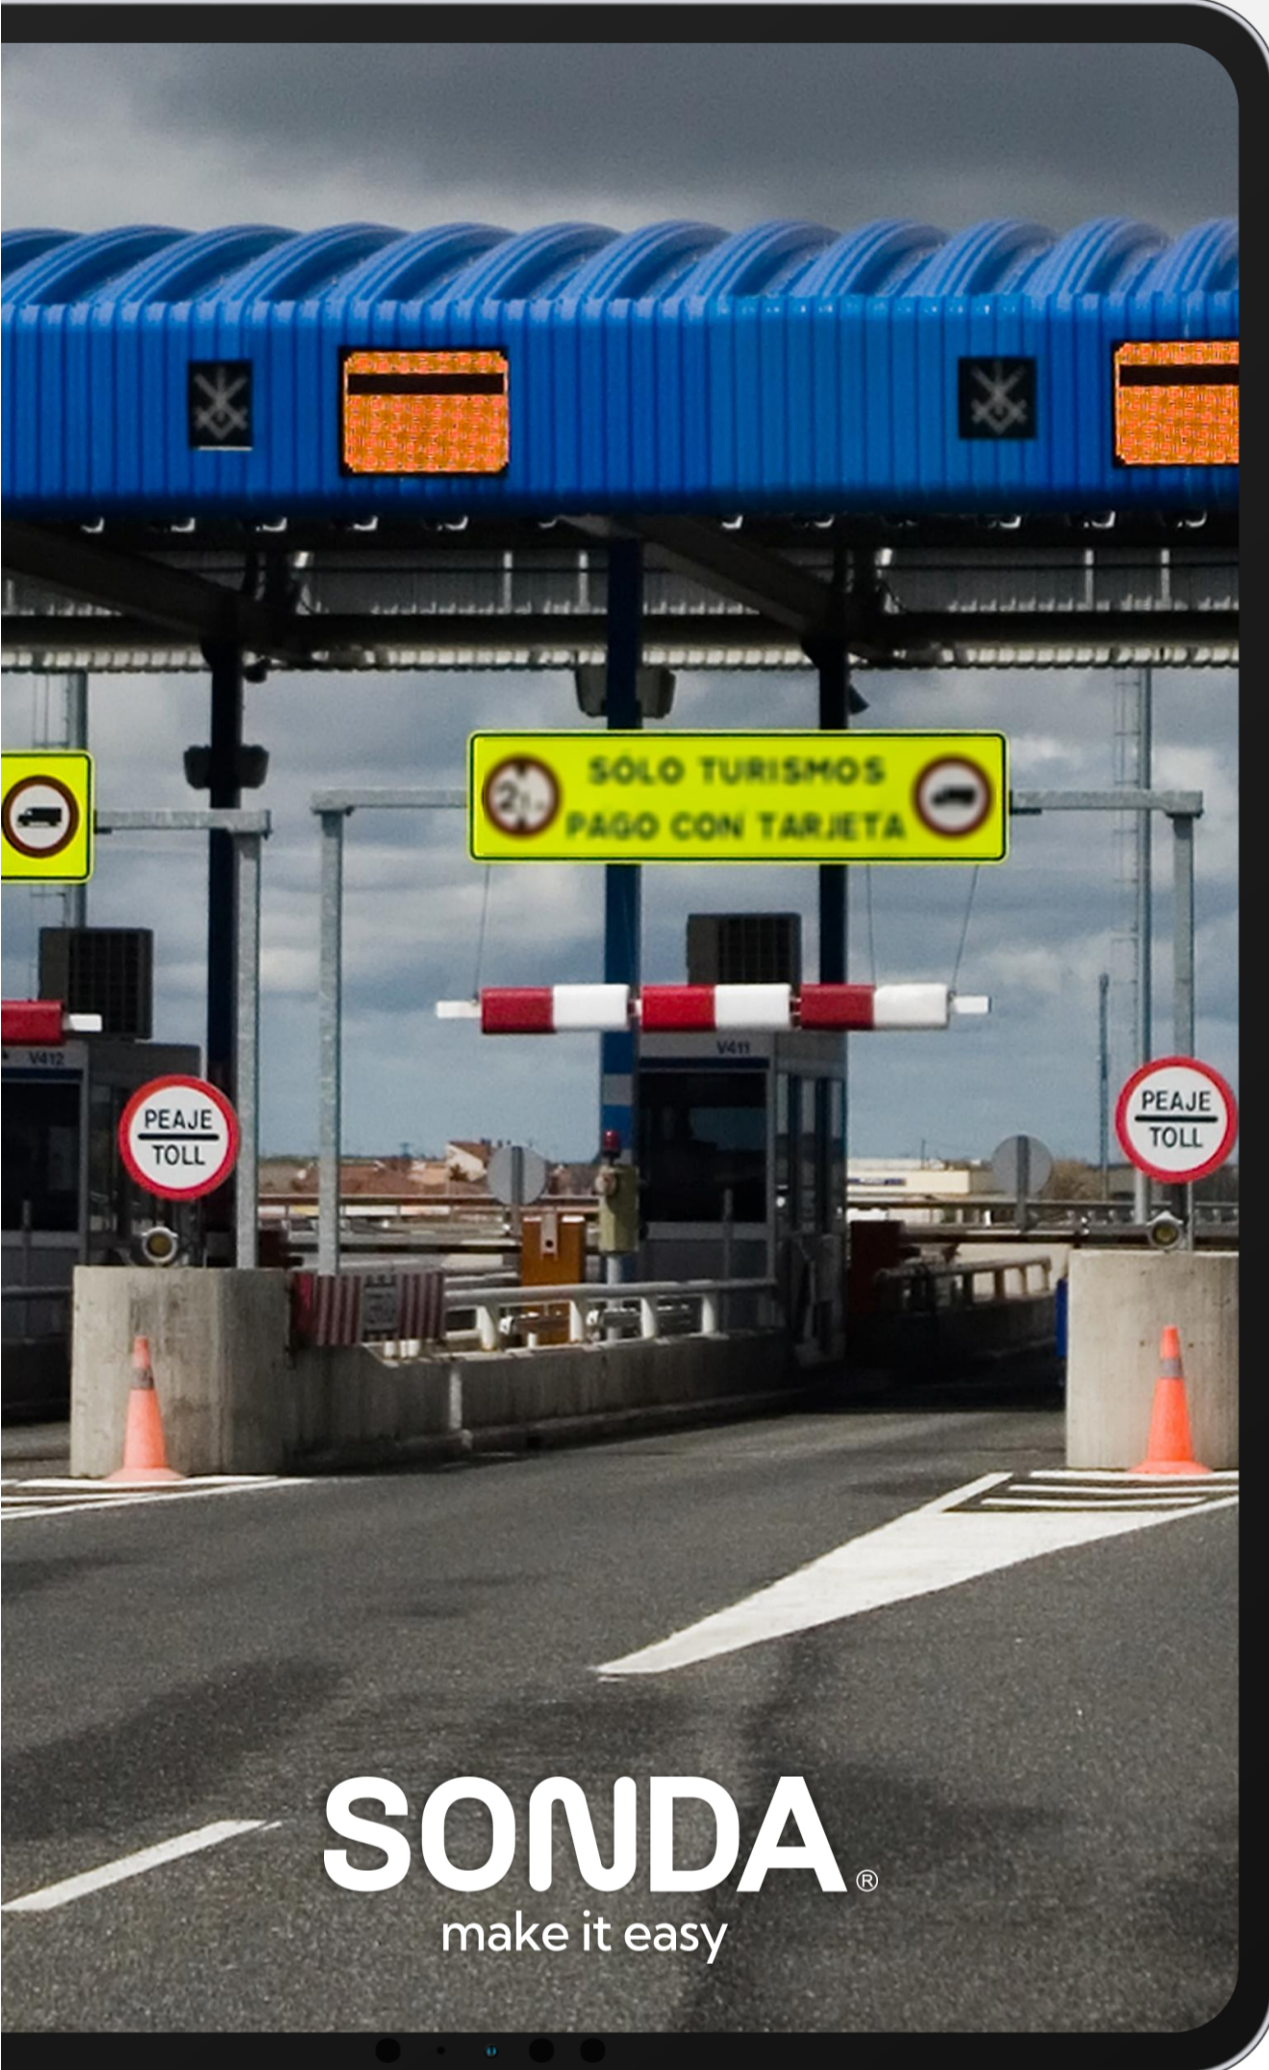

Implemented in: Chile

Challenge:

Modernization of traffic monitoring and control at toll plazas through intelligent tools that detect incidents and optimize vehicle flow during peak hours.

Solution:

- Installation of cameras, with communication infrastructure and servers.
- Implementation of a platform for centralized management.
- Configuration of analytics to detect incidents and anomalous behaviors.

Benefits:

- **Detailed visual evidence** of incidents.
- **Real-time traffic management.**
- **Technological foundation** prepared for **future expansions.**
- **Continuous monitoring** centers with **intelligent alerts.**
- **Reduction of accidents and congestion.**
- **High reliability and operational safety.**
