### Integrated Security System Solution for Food Logistics Centers

Implemented in: Uruguay

#### Challenge:

Creation of a scalable and integrated security solution, with intelligent video monitoring centers and centralized management, ensuring end-to-end protection across a large and critical area for the national food supply chain.

#### Solution:

- Implementation of a video surveillance system with analytics and a centralized management platform.
- Modern control center for visualization and rapid incident response.
- Automated resources for the protection of people, processes, and assets.

## Benefits:

■ Automated and intelligent security.

■ Centralized and efficient monitoring.

■ Rapid response to events and incidents.

■ Prevention of physical and operational risks.

■ Scalable structure prepared for future expansions.
