## Smart Cities & Mobility

### Intelligent Video Surveillance Solution for Security Management in High-Traffic Areas

Implemented in: Uruguay

#### Challenge:

Reduce operational costs and improve efficiency in the management of security incidents in high-traffic environments through intensive video surveillance, centralized monitoring, and customized analytics.

#### Solution:

- Implementation of cameras with continuous recording and centralized monitoring.
- Analytics for forklift speed control and parking management.
- Real-time remote monitoring for rapid incident response.

## Benefits:

Centralized security management through a control center.

Efficient real-time **response to incidents.**

Reduction of operational costs without **compromising security.**

Advanced analytics for **strategic decision-making.**

Optimization of **resource usage and surveillance structure.**
