End-to-End Solution for the Implementation of Administrative Offices with Integrated Infrastructure and Services

Implemented in: Mexico

Challenge:

Implement a functional administrative space with capacity for a professional team, ensuring operational efficiency and integration with existing infrastructure and technical standards.

Solution:

- End-to-end implementation of a new workspace with workstations, meeting rooms, and technological and electrical infrastructure.
- Turnkey project including design, furniture, technology, and associated services.
- Long-term contract with integrated maintenance and technical support.

SONDA[®]
make it easy
