Managed Cloud and Data Center Services Solution for a Regulated Financial Environment

Implemented in: Chile

Challenge:

Ensure high availability, security, and regulatory compliance in a critical financial environment, with centralized and efficient infrastructure management.

Solution:

- Operation of private cloud and multicloud environments for regulated settings.
- Dedicated backup services, continuous monitoring, and cybersecurity.
- Management of operating systems, databases, and communication links.

Benefits:

High availability and reliability of **critical services**.

Robust data **protection and backup policies**.

Proactive monitoring centers and **continuous operation**.

Reduction of operational risks and **greater cost predictability**.
