Cloud Integration Solution for Interbank Payment Messaging (SWIFT)

Implemented in: Peru

Challenge:

Integrate the SWIFT system with existing platforms, ensuring operational continuity, security, scalability, and regulatory compliance, without replacing the payment engine.

Solution:

- Integration of the SWIFT system with the entity's legacy systems through a cloud-based architecture.
- Ensuring operational continuity of the existing payment engine without requiring reengineering of the core banking system.
- Secure, scalable platform aligned with regulatory requirements.

Benefits:

Operational continuity without **structural changes to the core system.**

Significant cost reduction by **avoiding replacement of existing infrastructure.**

On-demand scalability and **flexibility, optimizing investments.**

High availability, security, and **resilience aligned with international standards.**

Acceleration of time to market for **regulatory compliance.**
