Cloud Modernization Solution for Critical Banking Systems

Implemented in: Chile

Challenge:

Migrate critical banking systems to the cloud, ensuring regulatory compliance, high availability, security, and performance, while reducing costs and dependence on on-premise infrastructure.

Solution:

- Migration of critical applications from on-premise environments to the cloud.
- Delivery under a SaaS model with managed cloud infrastructure.
- Operation with high standards of performance, security, and compliance for mission-critical environments.

Benefits:

■ Cost reduction between 30% and 40% compared to on-premise environments.

■ Automatic recovery **within minutes, ensuring operational continuity.**

■ On-demand scalability, **avoiding resource overprovisioning.**

■ Greater agility in system evolution, **accelerating time to market.**

■ Security and resilience aligned with **international cloud standards.**
