Integrated Solution for Ambulance and Fleet Management

Implemented in: Uruguay

Challenge:

Centralize and optimize the management of ambulances and fleet vehicles by improving maintenance planning, mileage tracking, and overall fleet operational availability through SmartPlatform's Asset Manager.

Solution:

- Manage a diverse fleet and its vehicle specifications.
- Schedule preventive and corrective maintenance activities.
- Plan maintenance tasks and equipment replacement cycles.
- Automate maintenance based on mileage thresholds.
- Integrate with Universal Assistant to capture and synchronize mileage data.

Benefits:

Efficient planning, task management, and maintenance based on dates and mileage.

Greater fleet control, with centralized visibility of vehicles and their specifications.

100% SaaS platform, flexible and scalable.

Reporting: generation of specific reports to support management.

Up-to-date information: integration with the Universal Assistant service to retrieve mileage data.
