Intelligent Asset and Maintenance Management Solution for the Railway Industry

Implemented in: Mexico

Challenge:

Optimize the management and maintenance of railway assets, eliminating fragmented information and improving visibility into their condition and lifecycle through SmartPlatform's Asset Manager.

Solution:

- Shared use of the platform by the client and SONDA
- Access to information from any location and device
- Field work on railway assets
- Alerts for upcoming maintenance activities
- Asset grouping capabilities with Asset Manager

Benefits:

Real-time visibility into asset status and condition.

Comprehensive planning for all types of maintenance.

Maintenance resource optimization.

Detailed reporting for asset monitoring and management.

Centralized management of asset information.
