Management and Control of Project Assets Managed by SONDA

Implemented in: Chile

Challenge:

Centrally manage all devices and assets under SONDA's responsibility.

Solution:

- SmartPlatform's Asset Manager for the management, maintenance, and assignment of project assets, providing complete traceability throughout their lifecycle.

Benefits:

Anytime access to the history of each asset.

Report generation to maximize visibility into installed assets.

Centralized management of all project assets.

Asset lifecycle and condition tracking.

Control and traceability.
