BUSINESS CASE

Smart Cities & Mobility

Bus and Project Asset Management

Implemented in: Chile

Challenge:

Consolidate all project assets into a single platform, including buses, validators, and onboard equipment.

Solution:

- SmartPlatform's Asset Manager: manages the complete lifecycle of each asset, including registration, preventive maintenance, and the creation of different asset profiles to support operations.

Beneficios:

Centralized management of all project assets.

Report generation to maximize visibility into project assets.

Anytime access to the history of each asset.
