Integrated Asset Management Solution for Warehouses and Customers

Implemented in: Uruguay

Challenge:

Centrally and efficiently manage assets stored in the main warehouse, ensuring visibility into their status, expiration dates, and warranties, while keeping information up to date to support operational and accounting management.

Solución:

- Asset Manager to manage and maintain traceability of assets associated with more than 60 customers.
- Monitor expiration dates, support agreements, and warranties, generating alerts for timely management.
- Integrate with the accounting system to keep information up to date and consistent.

Benefits:

Streamline asset management.

Minimize potential errors inherent in asset management activities.

Support SONDA's operational and accounting management.

Centralized and up-to-date information.
