Integrated Physical Security Solution for Supermarket Chains

Implemented in: Uruguay

Challenge:

Unify and centralize physical security management across stores to reduce operating costs and enable more efficient security incident management.

Solution:

- SmartPlatform's Event Manager to integrate new technologies with existing systems.
- Coverage of critical areas and reduction of blind spots.
- Traceability of individuals of interest within facilities through video analytics.
- Detection of unauthorized individuals in specific areas.
- Benefits:
- Real-time alerts from multiple systems to support security incident detection.

Beneficios:

Real-time alerts from multiple systems to support security incident detection.

Security incident management from a centralized monitoring and operations center.

Reduced security costs.

Access to live and recorded video from all stores through the centralized monitoring and operations center.
