Risk Rating Agencies

"The downgrade of SONDA S.A.'s (SONDA) long-term national ratings to 'A+(cl)' from 'AA-(cl)' reflects more pressured profitability (...) **The Stable Outlook incorporates that the company will gradually increase its revenue levels, stabilize its EBITDA margin and maintain a positive free cash flow (FCF)** given the restructuring of contracts, the increase in contract closings and a conservative level of investments." **Fitch Ratings**

It positively weighs the regional scope of its operations, with high levels of diversification in terms of presence in Latin American economies. (...) **The 2025–2027 strategic plan has entailed greater commercial effort in its initial stages, negatively impacting margins, but with a recovery bet based on a higher volume of contracts"** **ICR Chile**
